

Application

- S6100 anesthesia system is used in the medical department for inhalation anesthesia, control breathing or auxiliary breathing to patients and used for monitoring and displaying the patient's ventilation parameters

Main Technical Parameters

- Gas source:
 - O₂ (for medical use)
 - N₂O (for medical use)
 - AIR Compressor (for medical use)
- Ventilation mode: —IPPV
 - A/C
 - PCV
 - SIMV
 - SIGH
 - MANU
- Alarm and protection system:
 - continuous pressure alarm for breathing system
 - alarm for airway pressure over ranging
 - alarm for ventilation volume over ranging
 - Apnoea alarm
 - alarm for ventilation system integrity
 - oxygen fault alarm
 - alarm for power supply fault
- Power:
 - Voltage :100-240V ~
 - Power frequency: 50 /60HZ
 - Input Power: 80 VA
